

What would your world be like without **MAGNETS**

Household chores will be harder

Washing machines and dryers use magnets. So do garbage disposals and vacuum cleaners.

Better start writing letters again

Telephones use magnets — so do computers (no email!)

Visitors to your house will have to knock

Doorbells use magnets.

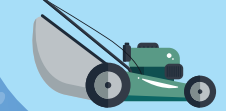

Skyscrapers would look boring

Magnets are used to coat their glass with colors and other functional coatings.

Yardwork would take longer

Electric lawn mowers and leaf blowers use magnets.

Food would spoil more rapidly

Magnets are used to coat food packaging and make the seals last longer.

Making dinner will be tougher

Mixers, blenders and microwave ovens use magnets.

Be prepared to lift your garage door

Automatic garage door openers use magnets.

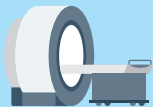

Listening to music won't be easy

CD players and headphones use magnets

Doctors would have a more difficult time making diagnoses

MRIs use magnets.

You'll be late for work more often

Alarm clocks use magnets.

There would be less electricity in the world

Most power plants use magnets in generators to produce power.

...or don't bother. You're not going anywhere anyway.

There are more than 30 magnets in your car.
